

Weekly Practice: Fractions & Living Things

Grade 4 - Unit 6 - Homework Packet B

Name: _____

Date: _____

Show your work. Answer the science questions in complete sentences.

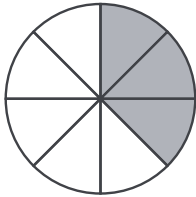

Part A - Math: Fractions

1. Shade $\frac{3}{4}$ of the bar below. Then write the fraction that is NOT shaded.

Not shaded: _____

2. The circle is cut into 8 equal slices. Write the fraction of the circle that is shaded.

Shaded = _____

of the whole circle

3. Add. Write each answer in its simplest form.

$$\frac{1}{5} + \frac{2}{5} = \underline{\hspace{2cm}}$$

$$\frac{3}{8} + \frac{4}{8} = \underline{\hspace{2cm}}$$

$$\frac{2}{6} + \frac{2}{6} = \underline{\hspace{2cm}}$$

4. Circle the larger fraction in each pair: $\frac{2}{3}$ or $\frac{2}{5}$ $\frac{5}{8}$ or $\frac{3}{8}$

5. Maya cut a pizza into 6 equal slices and ate 2 of them. What fraction of the pizza is left?
Explain how you know.

Part B - Science: Habitats & the Water Cycle

6. Draw a line to match each animal to the habitat where it lives.

Polar bear

Sonoran desert

Cactus wren

Ocean

Bottlenose dolphin

Arctic tundra

7. Name two things every habitat must give an animal so it can survive.

1) _____

2) _____

8. Fill in the missing word. When the sun heats a lake, water changes into water vapour and rises into the air. This step of the water cycle is called e _____.

9. Number the steps of the water cycle in order from 1 to 4.

☐

Precipitation

☐

Evaporation

☐

Collection

☐

Condensation

10. Water vapour rises high into the sky, where the air is much colder. Explain in one or two sentences why clouds form there.
